

# Sadia Hameed

## SQA Engineer at Kinectro

Experienced SQA Engineer, with a demonstrated track record in various testing methodologies. I bring expertise in manual and automated testing.

### My key skills:

- Requirements analysis, writing comprehensive test scenarios, test cases, executing tests and reporting defects.
- Skilled in app testing, load and stress testing with tools like Appium, and JMeter
- Specialized in API testing using Postman and Swagger, guaranteeing reliable inter-service communication
- Expert in test automation tools like selenium, playwright, cypress and appium.
- Experienced in working with programming languages, Python, Java and JavaScript.
- Agile and Scrum methodologies are key aspects of my workflow.

Committed to continuous learning, self-improvement and user-focused software solution.

## Skills & Strengths

- |               |              |                |
|---------------|--------------|----------------|
| • Python      | • JavaScript | • Java         |
| • Selenium    | • Playwright | • Postman      |
| • API Testing | • JMeter     | • Load Testing |
| • JIRA        | • HTML       | • CSS          |

## Experience - 3 years

### SQA Engineer

KINECTRO - Lahore, Pakistan | Jan 2024 - Present

- Designed and implemented test plans and cases for functional, regression, and performance testing to ensure product quality.
- Developed and maintained a Playwright automation framework, enabling **cross-browser parallel testing** for enhanced efficiency.
- Managed **framework development**, pushed code to **GitHub and Bitbucket**, and ensured version control best practices.
- Integrated Playwright **automated tests into CI/CD pipelines**, ensuring seamless execution and early defect detection.
- Identified, documented, and managed defects while collaborating with development teams to drive quality improvements.

### SQA Engineer

ZAPTA TECHNOLOGIES - Lahore, Pakistan | Jul 2023 - Jan 2024

#### Job Responsibility

As an SQA Engineer, I enhance team productivity by offering the following value-added services:

- Performing Manual Testing, encompassing test scenarios preparation, test case writing, execution, and bug reporting.
- Automated comprehensive test cases using playwright with javaScript and prepared allure report.
- Proficiently executing API testing using Postman and Swagger.
- Collaborating seamlessly with Developers, Project Managers, and Business Analysts for efficient bug rectification.
